### RE: Fleet Renewal and Lighting Retrofit Progress Report

The Pasha Automotive Services environmental funding agreement contains two projects. Below is the report on each project:

#### Item 1—Fleet Renewal:

This item is 100% complete  
Total cost expended is \$60,668.91

We purchased two new hybrid SUVs from Westcott Mazda on 8/15/08. The vehicle costs were \$30,182.25 and \$30,486.66. Per the Port agreement we have invoiced under separate cover \$5,500 per vehicle for a total of \$11,000.

#### Item 2—Lighting Retrofit:

This item is 0% complete  
Total cost expended is \$0.00

We have subcontracted with American Lighting to perform the lighting retrofit. The start date for the project is January 22<sup>nd</sup>, with an anticipated completion date of February 6<sup>th</sup>.

The next reporting will be the final reporting that will accompany our invoice to the San Diego Unified Port District. We do not anticipate any issue that might affect the project cost or schedule.

This letter has reported the status of our environmental projects. Again, I will provide a final report on the Lighting Retrofit project with the invoicing once the project is complete. Any questions should be directed to Christina Magee at 619-419-1071.

Sincerely,

  
Christina Magee  
Finance Manager
