

The July 14, 2006 Ninyo & Moore Hazardous Materials Technical Study and July 26, 2006, AEI Consultants Phase II Subsurface Investigation were used as the basis for the hazardous materials evaluation included in the EIR for the current Harbor Island Hotel Project (4-story, 175 room hotel located east of the existing Sunroad Resort Marina building). ICF Jones & Stokes did not conduct any updates to information contained in the reports for purposes of completing the EIR.

The Project in the 2006 reports was the originally proposed project (600-room hotel complex encompassing all of East Harbor Island). The Port District and ICF Jones & Stokes determined that the Ninyo & Moore and AEI Consultants reports are still appropriate and adequate assessments of the current Project site because the Project site evaluated in the EIR is located within the limits of the area evaluated in the 2006 reports.
