

Why is this important?

Will result in a long-term planning document that develops strategies to reduce greenhouse gas emissions and address local vulnerabilities to climate change.

Why are we doing this?

- **Greenhouse Gas Mitigation**
 - CEQA Guidelines
 - AB32 – Global Warming Solutions Act
- **Climate Change Adaptation**
 - Ex. Order S-13-08 (2008) - create statewide consistency in planning for sea level rise
 - AB2598 (now AB 752 Brownley) – require public trustees of state lands to develop sea level rise action plan

Climate Adaptation

- Identify vulnerabilities within Port jurisdiction
 - Sea level rise
 - Shoreline Erosion
- Identify and prioritize next steps

Timeline

- Work underway now
 - Regular workgroup meetings
 - Upcoming public workshop TBA
- Draft plan ready for review in Spring 2012
- Can be used for CEQA reviews once adopted

Thank You
