Project Title: Installation of Electrical Infrastructure for Continuous Shore Power at "Pride of San Diego" Floating Dry Dock by BAE Systems San Diego Ship Repair, Inc.

Project Applicant: Eric Icke, Vice President/General Manager, BAE Systems San Diego Ship Repair, Inc., 2205 East Belt Street, San Diego, CA 92113; (619) 551-8863

Project Location – Specific: 2205 East Belt Street, San Diego, CA 92113

Project location – City: San Diego

Project Location – County: San Diego

Description of Nature, Purpose, and Beneficiaries of Project: The proposed project would involve the installation of new electrical infrastructure on the "Pride of San Diego" floating dry dock by BAE Systems San Diego Ship Repair, Inc., in the city of San Diego, California. Implementation of the proposed project would upgrade the existing electrical distribution system to enable the dry dock to operate on continuous shore power in place of the current diesel generators during submergence periods associated with docking and undocking activities. Following completion of the proposed project, the operation of diesel generators would be limited to emergency backup power sources and related maintenance and testing.

Work to specifically complete the proposed project would involve the installation of surface-mounted electrical conduit from the landside "Building 13" electrical room along the bulkhead and to the pier's end.

Two (2) new 12 kV switches and swivel capable cable reel systems would be installed at the end of the pier, which the new electrical conduit would run through before continuing to the dry dock. Once extended to the dry dock, the conduit would run through a new pull box, to be installed, and continue within the interior of the dry dock towards the existing transformer and main switchboard on the northern wing deck. From there, the conduit would connect to the transformer and load interrupter switch located on the southern wing deck. There would be no trenching required to install the new conduit, as new wiring would either be surface-mounted along the bulkhead and pier or would utilize existing 4" conduits. Additionally, no in-water work is proposed.

Construction of the proposed project is anticipated to begin in the Summer 2025. Installations would occur as components become available, so while the proposed project may extend over a matter of months, work would be non-continuous during that time. A crew of approximately three (3) personnel would be required to complete the proposed project.

Due to its nature and limited scope, construction of the proposed project would generate a minor amount of vehicle trips and would require limited use of equipment. Therefore, impacts related to air quality, greenhouse gas emissions, and transportation and traffic are not anticipated to occur. Furthermore, the Applicant would be responsible for complying with all applicable federal, state, and local laws regarding construction demolition debris, hazards and hazardous materials, and stormwater.

Name of Public Agency Approving Project: San Diego Unified Port District (SDUPD)

Exempt Status: (Check one): ☐ Ministerial (Sec. 21080(b)(1); 15268);
☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));

Tenant Project Number: 2025-070

- **Categorical Exemption(s): Existing Facilities (SG § 15301) (Class 1), New Construction or Conversion of Small Structures (SG § 15303) (Class 3), and Accessory Structures (SG § 15311) (Class 11)**
- **Statutory Exemption. State code number:**

Reason Why Project is Exempt: The proposed project is determined to be Categorically Exempt pursuant to California Environmental Quality Act (CEQA) Guidelines Sections 15301 (Existing Facilities) and 15311 (Accessory Structures), and Sections 3.a. and 3.i. of the District's *Guidelines for Compliance with CEQA* because it would consist of the upgrade of an electrical distribution system and installation of minor accessory structures and that would involve no expansion of use beyond that previously existing and would not result in a significant cumulative impact due to the continuation of the existing use. Sections 3.a. and 3.i. of the District's *CEQA Guidelines* are as follows:

- 3.a. **Existing Facilities (SG § 15301) (Class 1):** Includes operation, repair, maintenance, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:
- (1) Repair, maintenance or minor alteration of existing mooring facilities, floats, piers, piles, wharves, bulkhead, revetment, buoys, or similar structures; marine terminal facilities; airport facilities; and commercial industrial, or recreational facilities.
 - (7) Existing facilities used to provide electric power, natural gas, sewerage, or other public utility service.

AND/OR

- 3.c. **New Construction or Conversion of Small Structures (SG § 15303) (Class 3):** Includes construction of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and conversion of existing small structures from one use to another with minor modifications to the exterior of the structure. Examples of this exemption include:
- (2) Accessory (appurtenant) structures and mechanical equipment including, but not limited to, garages, sheds, railway spur tracks, pilings, temporary trailers, industrial equipment enclosures, fences, parking, on-site roadways, walkways and health and safety devices.

AND/OR

- 3.i. **Accessory Structures (SG § 15311) (Class 11):** Includes construction, or placement of minor structures accessory to (appurtenant to) existing facilities, including:
- (2) Construction or placement of minor structures or equipment accessory to (appurtenant to) existing airport or marine terminal facilities.
